Essential products for transporting food from your kitchen  
and feeding pupils in your care

# Transporting school meals while keeping them fresh, hot and tasty

It is a given that children need a daily hot meal not just to thrive, but to survive. It is also becoming clearer that many children are in danger of going without, especially so during school holidays, but with the amazing help of many this is being avoided.

Our job is to help you with the logistics of how to get meals to children/those in your care, while still fresh, hot and tasty. We've pulled together some practical products which are tried and tested and are in constant use in schools around the country to feed those where it is needed.

Correct packing of Thermoport boxes is essential to get the best out of the system. BGL Rieber provides training with its Thermoport products to ensure food is packed correctly. We can also advise on what transports well... and how to present food at the destination.

For help in feeding the children in your care now and over the school holidays, call the BGL Rieber team on 01225 704470 for advice.

## Thermoport® 50 insulated food transportation box

Cook, fill, transport, serve  
... simple

Thermoport 50 insulated food transport boxes keep food hot, cold or ambient for several hours.

- Light, robust, pore-free plastic, fully insulated.
- Non porous plastic - perfect for infection control.
- Dishwasher safe up to +95°C.

Meals are loaded into the box from a central kitchen or even from a remote kitchen and transported to where needed.

For the best food quality and absolute transport security, this stackable top loading box is best used with the Rieber GN system (see page 4), especially with anti-spill lids to keep everything safe and secure during transportation.

The interior space can be divided into separate areas using the insulated divider.

Rieber Thermoport 50 is fully stackable and can be used in conjunction with the full range of Rieber Thermoport products.

## GN Operating System

The perfect fit for  
cooking, transporting  
and storing school meals

Rieber is a leading manufacturer of GN containers and lids.

The company invented the GN Operating System which maximises efficiency, ease of use and makes the best use of space during cooking, transporting and storage.

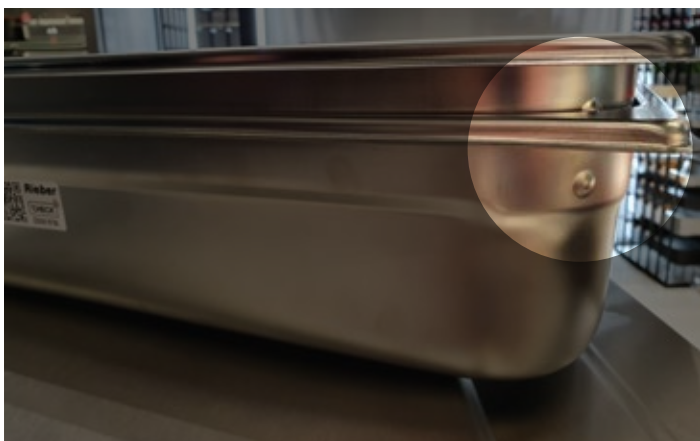

Made from food grade stainless steel and available in many sizes, perfect for both transporting and serving food.

- Simple, robust and hygienic.
- Also available with anti-spill lids, ensuring nothing spills during transport.
- And... flat stacking lids; lids with handles; hinged lids; and lids with cutouts... the choice is yours.

Designed to work hand in hand with the complete range of Rieber cooking and food transport products.

## ... and now with no sticking

You can now stack your GN containers without the risk of sticking, with the introduction of the **GNONE stacking lug**, an embossed lug to each corner, which means the container will now easily stack without the risk of getting stuck.

## Complete safety during transportation

### Anti-spill lids for GN containers

**Lids for all sizes of GN containers.** The silicone seal is ultra hard wearing, waterproof, heat-resistant and ensures NO SPILLS during transport.

- Stainless steel, absolutely food-safe, odourless, antibacterial and hygienic.
- Sealing lip made of silicone rubber, food-safe and temperature-resistant.
- Ensures the highest level of security against spilling.
- Resistant seal even if dropped.
- Stable, robust and dishwasher-safe.
- Maximum working temperature 180°C

Other lids designed specifically for Rieber GN containers include:

- Stainless steel push-in lids - stackable
- Stainless steel flat lids - with handles

## School Meals... a quick ready reckoner
