Data sheet

thermoport® K 2x6000 unheated - orange

The neutral food transport box.

The stackable frontloader is used for the safe transport of food in a GN system and for keeping the food hot and cold. For the best food quality and complete transport safety.

Space-efficient configuration with GN containers and GN thermoplates® in combination with the transport-safe, watertight press-in lid or in a vacuum with the vaculid® lid. GN 1/1 heating or cooling pellets can be inserted accordingly for passively keeping food hot and cold. Hot and cold food can be insulated separately during transport thanks to the insulated divider.

Rieber thermoport® made of plastic and stainless steel can be stacked together and placed on the transport or serving trolleys – for slip-resistant and safe transport.

TECHNICAL SPECIFICATIONS

thermoport® K 2x6000 unheated - orange

TECHNICAL SPECIFICATIONS

Dimensions	766 x 779 x 1280 mm
Material	polypropylene
Weight	53 kg
Capacity with GN	208 L
Support rails	2 x 12
Rail distance	36 mm
Castor	with brakes
Wheel diameter	125 mm
Ambient temperature	-20°C to +100°C
Dishwasher safe	until 90 °C

Order number 85 02 08 02

BENEFITS

Lightweight, robust and pore-free plastic, double-walled and tightly welded.

Well insulated, low loss of heat/cold.

Ergonomic, hinged handles and high-quality snap locks.

Replaceable floor protection rails.

With a removable door for quick and easy cleaning.

Dishwasher-safe up to +90°C.
