Multipolar® communal refrigeration, safe and secure, with individual, lockable compartments

Rieber's Multipolar® range is an ingenious series of undercounter and freestanding refrigerators with four to 16 lockable compartments.

Ideal for students, staff, patients, workers, all communal living areas and anywhere there is a requirement for personal shared refrigerated storage...

- **Nut allergies? Dairy free? Gluten free?** Multipolar® is great for keeping special meals separate for people with allergies and intolerances.
- Retaining **meals, drinks** and any products requiring refrigeration - keeping them safely chilled until they are required, for example night or shift workers.
- Keeping **personal and private** refrigerated goods separate in communal shared areas.
- Storing personal **medicines** requiring refrigeration.

BGL Rieber supplies Multipolar® units to:

- Care facilities, including hospitals and care homes
- Offices and corporate cèches
- Universities, schools and nurseries
- Secure facilities
- Communal shared accommodation

Multipolar® can be freestanding or fits under a worktop - to accommodate whatever space you have available.

Multipolar®

The safest and most efficient communal refrigerator

Rieber has the perfect refrigerator solution for situations where people live or work together – the cost-effective and energy-saving Multipolar®. Available with 4-16 individual compartments each with its own unique key, with a perfect constant temperature.

For the individual and flexible storage of food in communal areas

What makes Multipolar® so special?

Up to 16 refrigerators in one...

Temperature range approximately +2 °C to +12 °C

The Multipolar® range is based on a varied range of cabinet sizes to suite all requirements.

- Undercounter units house 4 or 6 compartments, and fits underneath worktops.
- Full size, free standing models featuring 8 to 16 compartments, in a range of cabinet sizes.

Each compartment within the Multipolar® unit has its own key, with a master key retained by the relevant manager.

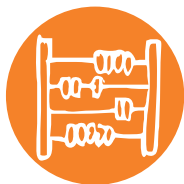

The outside housing is made of galvanized steel plating, which is electrostatically powder coated and impact resistant. All standard models are white, stainless steel is available on request.

The inner chamber is made of hygienic, fruit acid resistant polystyrene (PS), completely food-safe, odour-free and antibacterial.

Sturdy door hinges and an all-round magnetic chamber seal guarantee safety in day-to-day use.

The energy-saving and powerful cold compressor produces very little noise or vibration, thanks to a special bearing application.

Equipped with an automatic defrosting and condensation water evaporation.

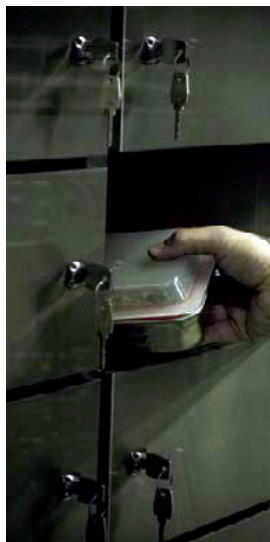

5 x Multipolar refrigerators
= 72 secure compartments

...FOR GREAT ORMOND STREET

Among the many users benefiting from Multipolar®, the world-famous children's hospital and care facility is now using this secure compartmentalised refrigeration.

GOSH is using two x 12 compartment and three x 16 compartment models, providing 72 secure mini fridges in total.

They are being used in communal areas; each compartment has its own key and is suitable for storage of both medication and foods.
